Main Features:
- Frequency Range: 15 to 27 GHz.
- Typical values: Gain 16 dB
- RF connectors (I/O): 2.92 mm Female
- Solder filtered pins for DC connection
- Several mounting options
- Gold plated compact aluminum housing
- Hi-reliability and dedicated screening/environmental tests available under request

**ERZ-HPA-1500-2700-29**

The ERZ-HPA-1500-2700-29 is a K Band Amplifier providing up to 29 dBm and a gain of 16 dB. The compact size and modularity makes it ideal for a wide range of applications.

**Typical applications:**
- Industrial / Laboratory
- Satcom / Telecom
- Space / Aerospace / Military

### Performance

<tr>
<td>Storage temperature</td>
<td>-55°C to 125°C</td>
</tr>
</tbody>
</table>

- Stress above these ratings may cause permanent damage to the device.
- It is final user responsibility to maintain the amplifier within the specified ranges.
Mechanics and Housing
Documentation and Test Reports

All modules are at least delivered with: Electrical Test Report, Certificate of Conformance, Certificate of Acceptance and Origin. Optionally, units can be environmentally tested (temperature, vibration...).

Option (HS): Heat Sink

A heat sink (HS) can be provided to allow the operation of Power Amplifiers. Please note that most power amplifiers need heat sink or appropriate heat dissipation strategy.

Space / Military Usage

Most of ERZIA’s products are based on rad-hard technologies and can be manufactured and integrated according to MIL / ECSS or specific hi-rel standard-screening for space, aeronautics, military or specific hi-reliability usage.

Customization and Extended Performances

ERZIA can fully design or adapt one of the existing RF amplifiers designs according to your specifications. Please contact us for additional information.
